OBJECTIVE

Final-year Computer Science & Design student specializing in robust Python backend development, core Object-Oriented Programming (OOP), and Data Structures & Algorithms (DSA). Skilled at building high-performance, production-grade services using FastAPI and MySQL, backed by a strong foundation in Cloud engineering, containerization, and DevOps automation. A collaborative team leader with hands-on experience across the full development lifecycle, looking to leverage strong problem-solving skills to design and build efficient, scalable production environments.

TECHNICAL SKILLS

- **Languages:** Python (OOP, Data Structures), C#, SQL
- **Backend Frameworks:** Fast API, Flask
- **Databases:** MySQL (CRUD Operations, Multi-Table JOINS, Schema Constraints, Data Validation)
- **DevOps & Cloud:** Docker (Containerization), Nginx, CI/CD Concepts, Linux, Git, GitHub, Cloud Instances (VMs)
- **Tools:** VS Code, PyCharm, Git, GitHub, Git Bash
- **Frontend Basics:** HTML5, CSS3, JavaScript

PROJECT

Smart Movie Recommendation Engine *Python · Fast API · MySQL · Docker* 2026 Jan – Present

- Developed a **Python** and **FastAPI** web API to filter and serve movie data, backed by a custom caching layer to speed up database lookups and reduce response times.
- Designed a relational **MySQL** schema to safely manage and cross-reference user watchlists, and deployed the app via **Docker** to a cloud server with automated uptime monitoring.

TAP2TRACK (SIH Hackathon Project) *Java · Spring Boot · MySQL · HTML/CSS* Sept 2025

- Developed a real-time bus tracking system using drivers' and conductors' active device networks, eliminating the need for external **GPS** hardware.
- Built the **Spring Boot** backend with a **MySQL** data layer, achieving a cost-effective, scalable deployment that improved student commute tracking and visibility.

Linux Shell Automation Scripts *Bash · Linux · DevOps Fundamentals* 2025

- Automated recursive file management and system monitoring with **Bash** scripts, using Cron jobs, secure file permissions, and active process management.

SQL Database Testing Suite *SQL · MySQL · Relational Integrity* 2024

- Designed and executed **30+ test cases** covering CRUD operations, multi-table queries, and cross-entity constraints, documenting relational anomalies to simulate QA workflows.

EDUCATION

- **B.E. – Computer Science & Design** | GPA: 8.0 / 10.0

Erode Sengunthar Engineering College, Anna University, Erode | 2023 – 2027

- **HSC (Class XII)** | 71%

Sri Sai Higher Secondary School, Tirupur | 2022 – 2023

CERTIFICATIONS & ACHIEVEMENTS

- **Technical Certifications:** Python & Java Programming (Infosys Springboard & Hacker Rank) | Cyber Security and Privacy (NPTEL)
- **Experience & Training:** Python Development Online Internship (CodSoft) | Cloud Computing Workshop (2025)
- **Academic Presentations:** Research Paper Presentation at KSR College of Engineering (Oct 2025) | Intelligent Transport System Design with AR/VR Seminar (2025)
